GTI Sports Cloth interior, The Golf GTI 7.5 Performance in manual form is perhaps the greatest GTI ever built for the purist. It is a brilliant blend of precision, power, and pure driving enjoyment.

At the heart of the GTI 7.5 Performance is a 2.0-litre turbocharged 4 cylinder engine, producing 245 PS (about 242 horsepower) and 370 Nm of torque. Paired with a six-speed manual gearbox, the car offers a rewarding, connected feel that's hard to replicate in modern automatics. The manual transmission is slick and precise, with a well-weighted clutch + positive gear engagement that make each shift satisfying.

Performance is strong, with 0-62 mph in around 6.2 seconds. But it's not just about straight-line speed – what really sets the GTI 7.5 Performance apart is how it handles. The addition of the VAQ limited-slip differential, exclusive to the Performance model, transforms front-end grip and cornering stability. It actively distributes torque between the front wheels, reducing understeer and allowing for much sharper turn-in and power application when exiting corners.

It's a rare modern hot hatch that still delivers old-school thrills without compromising modern practicality.
